SUMMARY

Experienced Software Development Engineer with **4+** years of expertise in **full-stack** development using **Node.js, TypeScript, React.js, MySQL,** and **MongoDB**. Proven track record in building scalable, high-performance applications across diverse domains, including **Fintech, Real Estate, E-commerce, HealthTech**, and **EdTech**. Skilled in API design, seamless **UI/UX** integration, and robust database architecture. Regularly leverage **generative AI** and advanced developer tools such as **GitHub Copilot, ChatGPT**, and **Cursor** to enhance productivity, accelerate development cycles, and maintain superior code quality. Strong advocate of clean code principles, agile methodologies, and collaborative teamwork to deliver innovative, performance-driven solutions.

EDUCATION

Bachelor of Technology in Computer Science and Engineering, ***AKTU University, Lucknow, INDIA***

8.61 **CGPA**

WORK EXPERIENCE

Programmer — *Apr 2024 – Present*

Company: *Dotsquares Technologies India Pvt. Ltd., Jaipur*

- **Software Development & System Analysis:** Designed and developed efficient software solutions by analyzing user needs, system workflows, data usage, and business processes.
- **Real-Time Communication:** Implemented socket programming to enable real-time chat and video call functionality, improving user engagement and responsiveness.
- **Third-Party API Integrations:** Integrated Google MAP API, Twilio, and SMS Chef, extending application capabilities for messaging, notifications, and performance optimization.
- **Performance Optimization:** Streamlined code and refined database queries, boosting system efficiency by 30% and reducing response time.
- **Analytics and Insights Scalable Architecture:** Incorporated Mixpanel and Sentry for error monitoring and data-driven insights.
- **API Caching & Memorization:** Reduced API calls by 40% by implementing a caching system in Redux.

Software Develop — *Dec 2021 - Mar 2024*

Company: *CEDCOSS Technologies Pvt. Ltd., Lucknow*

- **Performance Optimization:** Improved system efficiency by 30'« through code optimization and database query refinement.
- **Code Quality & Stability:** Reduced application crashes by 30% and increased user satisfaction by 20% through stakeholder collaboration.
- **Third-Party API Integrations:** Integrated 5+ APIs (Fresh Sale, Google Ads, analytics tools), enhancing application functionality and increasing user engagement by 40%.
- **Scalable Architecture:** Implemented AWS Lambda & SQS, reducing server costs by 40%.
- **Security & Compliance:** Enforced security best practices, achieving a 95% security compliance score, worked with the QA team to reach a 98% bug resolution rate through rigorous testing.

SKILLS

Technical Skills

Languages/Runtime	• *JavaScript (ES5, ES6+), TypeScript, Node.js, HTML5, CSS3, SQL.*
Frameworks & Libraries	• *React.js, Next.js, Express.js, Redux, Ant Design, Bootstrap, Tailwind.*
Databases & Storage	• *MongoDB, MySQL, PostgreSQL, Redis.*
API Development	• *RESTful APIs, GraphQL, WebSockets, Socket.io, OAuth 2.0, JWT, OpenAPI/Swagger.*
DevOps & Tools	• *Git, GitHub/GitLab/Bitbucket, Docker, Webpack, Postman, Jenkins/GitHub Actions (CI/CD), SonarQube, Nginx.*
Cloud & Infrastructure	• *Apache Kafka, AWS (Lambda, EC2, S3, RDS), Serverless Framework, Load Balancing, CDN, Caching (Redis).*
Architecture & Optimization	• *Microservices Architecture, Distributed Systems, Asynchronous Processing, Parallel Service Development, Code Refactoring, Logging & Monitoring (ELK/Prometheus/Grafana).*
Testing & Quality	• *Unit Testing (Jest), Integration Testing, Linting, Code Reviews, Debugging & Profiling.*
Agile & Collaboration	• *Agile/Scrum, Jira, Confluence, Slack/MS Teams, Excellent stakeholder communication & cross-functional collaboration.*

Professional & Soft Skills

- Strong leadership, team collaboration, and time management abilities
- Excellent in problem-solving, requirement analysis, and delivering under pressure
- Skilled in active listening, negotiation, and adaptable to diverse work environments
- Experience in mentoring junior developers and working in agile teams
- Quick to adopt and integrate new tools and technologies, including generative AI development using TypeScript with frameworks like LangChain, LangGraph, and LangSmith, as well as expertise in prompt engineering.

PROJECTS SUMMARY

- **Fintech Payment Gateway Integration** – Secure wallet and transaction system Razorpay API for real-time payments and reporting.
- **Real Estate Listing Platform** – Dynamic property search and listing portal with MERN, Google Maps API, and an admin panel for agents.
- **Multi-Vendor E-commerce Platform** – Scalable e-commerce system with vendor dashboards, Stripe payment integration, and order management.
- **EdTech Learning Management System (LMS**) – Online learning platform with course uploads, quizzes, AWS S3 storage, and ChatGPT-powered Q&A.
- **Healthcare Appointment Booking System** – Doctor-patient platform with scheduling, prescription upload, role-based logins, and admin controls.
- **Child Growth Tracker (EdTech)** – Growth and task tracking system for kids (0–8 yrs) with progress charts (Chart.js) and downloadable PDF reports.
- **UK Monetary Rate Study Tool** – Educational web app for students to explore historical UK exchange rate data with filters and visual charts.
- **SecureHealthcare CRM** – CRM platform to manage healthcare workers, patients, and service workflows with role-based access and real-time dashboards.
